

MuSe™: Multi-Channel Digital Music Server

Dimensions: 19" W x 7" H x 20" D

Weight: 39 lbs. Approx.

Enclosure: 4 RU industrial rack mountable chassis with locking cover

Finish: Black powder-coat textured

MuSe™ is a high performance hard disk based music server for professional, commercial, industrial and high-end residential applications. It is housed in a high quality 4 RU industrial 19" rack mountable chassis with locking cover for security.

The unit is available pre-configured to serve up to 4 channels of stereo music simultaneously. The music files can be accessed from the internal hard disc, DVD Rom, USB drivers and from other drives on the network including any NAS. Each channel can have multiple playlists that can be scheduled to play at any time. Each playlist can support up to 5000 songs. Each playlist has built-in random play to prevent sequential play and repeating songs. The unit also generates a log file of the titles of all the songs played along with time and date.

The system is designed for 24 / 7 autonomous operations. Total autonomous operation means no supporting keyboard, mouse or video display is needed. Music can be loaded to the system hard drives via USB, DVD disc or Ethernet connection. Easy interface to the Pragmatic PADS™ products allow for music distribution in a commercial environment on category 5 wires.

Applications:

Multiple room audio system in residential markets
Music server for hotels, restaurants, theme parks, fitness clubs, museums, shopping malls, department stores, etc.

Features & Benefits

Locking cover to prevent tampering
Number of outputs- 4 stereo channels max.
Hard disk: 80 GB standard, options 400GB+
Power Supply: 110VAC/240VAC field switchable
