

“Affordable Elegance” Product Line

DMS4.4™-KP

Your multi-zone music distribution now made simpler with Pragmatic’s new elegant keypad

This newly designed keypad is very simple, easy to use, touch-button oriented, and yet has the ability to control a truly phenomenal system like DMS4.4™ (described below). It also facilitates other existing music distribution systems currently available in the market.

The 4 yellow buttons on the face represent 4 sources through which your system transmits the audio signals, while the 3 buttons on the bottom half, are for volume up, volume down, and mute.

DMS keypad, which basically has a powerful in-wall amplifier integrated within it, has green LED displays, that beautifully contrasts with the plate. The amplifier delivers true high fidelity performance that actually rivals the sound quality of large stand-alone amplifiers. The unit also has a built-in IR detector for remote control of volume, muting and source selection.

The DMS4.4™ system, for which this keypad is designed, distributes audio signals from 4 different sources to 4 different listening areas, using a single category 5 cable to each zone. The cable run can be up to 250 feet from the source to each zone. Further, each zone is capable of independently selecting any source. By cascading additional DMS4.4™s, the system can be expanded in increments of 4 zones per unit.

Product specifications

| | | | |
|-------------------|----------------------|-----------------|-----------------|
| Continuous power: | 24 Watts per channel | Power: | 12 VDC |
| Peak power: | 60 Watts per channel | Freq. Response: | 20 Hz to 20 KHz |
