

DOMECAM

Do you need a high resolution black and white camera for surveillance purposes ?

Pragmatic has the answer.

The Domecam is a high resolution, black and white camera that transmits video through category 5 wire. With a built-in twisted pair video transmitter, the camera captures clean, detailed pictures. It is a great tool for purposes like surveillance, private security, and private investigation. Domecam provides users with an option of choosing between integrated lens and CS-Mount lens. The camera also provides mirror mode options and back light compensation, selectable on the board. This high performance 1/3" CCD camera is available in 50 or 60 Hz models.
