

“Affordable Elegance” Product Line

IN - WALL CAMERA

HideAway™ Series Security Camera

Do you need high quality security camera but don't have enough space for a traditional CCTV camera? Pragmatic has the answer. The HideAway™ series IWC™ In-Wall Camera System is the ideal choice for an affordable solution to doorway and access point security over category 5 twisted pair wires. The high performance 1/3" CCD camera along with associated drive electronics is installed in a single junction box with RJ45 connector. The video signal from the camera travels down a category 3 or 5 wire to the receiver unit which can be plugged in to a video monitor and a time lapse VCR. The power for the camera is also provided on the same category 5 wire so local power for the camera is not needed at the remote end.

There are a number of optional features available for this IWC™ In-Wall Camera System. Options include a pin-hole lens for covert applications, fish eye lens for wide-angle, C/CS mount adaptor for variety of standard lenses, a star light / night vision camera (0.05 lux), high resolution color camera, weather-proof single gang enclosure and a tamper-resistant steel face plate.
