

PRAGMATIC COMMUNICATIONS

"Affordable Elegance" Product Line

MuSe™

Multi-channel Digital Music Server

**16 Digital Stereo
Audio channels
and 500 hours
of great music!**

Give your customers an elegant distributed music system solution! It is very simple to operate, highly reliable and easy to install. The MuSe™ delivers very high quality stereo audio and at an affordable price.

This simple yet elegant system provides up to 16 independent stereo audio channels of unequalled sound quality with cable runs to 3000 feet! It distributes audio signals to more than 512 listening areas using only category 5 cable! The cables can be home run into a patch bay or can be daisy-chained. **MuSe™** finds applications in industrial and commercial installations including hotels, restaurants, cruise ships, sports bars, shopping malls, arcades, and theme parks.

The system head-end transmitter comes in a compact rack-mount enclosure and has a built-in multi-channel stereo audio server that can be controlled by a keyboard or remote Ethernet interface. The signal distribution and amplification is performed using the **TPA™** and the **SAA™** products.

Other salient feature of **MuSe™** includes easy play list generation, music scheduler, advertisement insertion and message management. It also provides immediate access to any song in the library. The basic **MuSe™** is capable of over 500 hours of digital music and can be extended to over 2000 hours of music with optional storage.
