

Users manual for the DMS-RX

The DMS-RX is a very simple device. The DMS –RX has several features that you will notice when you look at the device:

1. To RCA inputs on the *back*(1)
2. A Cat 5 output on the *front*(2)
3. And an infrared *remote input* on the side of the device(3)

To operate, plug in RCA inputs into the RCA in jacks located on the DMS-RX. Run a Cat 5 cable from the DMS-RX as many other DMS-RX transmitters as you need to with an overall limit of 300 ft. The DMS-RX is good up to 300 feet. The DMS-RX also houses slot for an infrared remote. You plug in the infrared remote into the DMS-RX and put it by the source that you want to control.
