

PRAGMATIC COMMUNICATIONS

presents

PRO Wireless

900MHz & 2.4GHz Wireless Audio/Video Products for Government, Security, and the Custom Installer

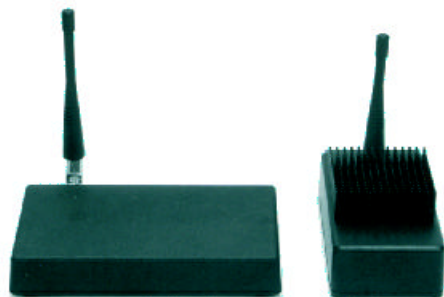

Pragmatic provides state-of-the-art wireless technology to premier security firms, law enforcement, bomb squads, fire departments, and the US Coast Guard. We also supply custom home installers with these products for unmatched wireless A/V distribution. Do

not confuse these professional products with the low performance/low cost units currently offered to the consumer.

Music transmission quality is exceptional with the **TrueMusic™ wireless stereo audio system**. The rich, full sound rivals the finest of direct connect speaker cables. Apply this product in any situation where an installed cable is not appropriate or possible.

Our high performance cameras can be ordered with low-light sensitivity down to 0.05 lux! The micro mini cameras are easily concealed as shown in the wall plate and clock on the right. Pragmatic's extra long range transmitter/receiver system has a range of up to 20 miles (clear line of sight, requires FCC license for US use).

These high quality products are excellent for use in: video conferencing, construction supervision, nanny watching, campus broadcasting, hazardous process management, driveway entrance security, and any other remote application where a wired system is not applicable.

All units operate at 900 MHz or 2.4 GHz frequencies. Our standard models are FCC certified and require no license. Call for special applications. OEM inquiries welcome. Custom frequency and power levels are available for qualified customers.
