**PRAGMATIC COMMUNICATIONS
RELEASES DOMECAM™**

Industry leader releases yet another unique product

Sunnyvale, CA, October 19, 2001- Pragmatic Communications Systems, Inc., the leaders in audio/video control and signal distribution, have added yet another innovative product to their series of wireless video cameras. Their brand new product, DomeCam™, is a high resolution black and white camera, with a built-in twisted pair video transmitter. The video and power is supplied through Category 5 wire. Pragmatic is shipping the product now.

Pragmatic's DomeCam™ is 3.5" in diameter, and 3.5" high. This high performance 1/3" CCD camera, available in 50 or 60 Hz models, has a horizontal resolution of more than 380 TVL. It has an excellent sensitivity of less than 0.1 lux. DomeCam™ runs on a standard 12V DC supply. It is ruggedly designed and manufactured, enabling the camera to operate in temperatures ranging from -25 degrees Celsius to + 55 degrees Celsius - certainly more demanding than most any use imagined. This makes the DomeCam™ well suited for many applications including covert

surveillance. The camera also provides mirror mode options and back light compensation, selectable on the board. The camera offers its users great versatility in focal length, view angles, and relative aperture. DomeCam™ also provides users with an option of choosing between integrated lens and CS-Mount lens.

The DomeCam™ finds its application in various avenues. It can be used both indoors and outdoors. It is a great tool for purposes like surveillance, private security, and private investigation.

Pragmatic Communications, located in the heart of Silicon Valley, was founded in 1994 by award-winning engineer Prasanna Shah. Based in Sunnyvale CA, the company designs and manufactures its products in the U.S., for both professional and consumer markets.

Pragmatic, known for their proprietary CATS™ and DMS™ technologies, provide products that are used throughout the world in demanding life-critical, educational and entertainment applications. The company's products are marketed exclusively to professional systems contractors. For additional information, please visit the Pragmatic Communications website at www.wireless-experts.com
