

“Affordable Elegance” Product Line

Twisted Pair Audio

SuperTranz™ circuit stereo audio system

Do you have a need to send high quality stereo audio signals on standard twisted pair wires?

Pragmatic has the answer. The HideAway™ TPA twisted pair audio is the ideal choice for an affordable solution. The line-level stereo audio signals can now be transmitted and received using simple twisted pair

wires. The remote TPA™ receiver can use the IWA™ (In-wall amplifier) or the SAA™ (Stereo Audio Amplifier) from Pragmatic to power the speakers.

The SuperTranz™ circuit eliminates ground loops and noise pick up. It also provides a robust signal for amplification. The system provides true plug and play simplicity and there is no need for manual gain adjustment on the receiver. This is *the* low cost and better performance alternative to other balanced audio line drivers and receivers on the market.

The transmitter and receiver units have a standard RJ-45 plug for twisted pair wire interface, pair of standard phono plugs for stereo line-level audio signals and a 12 VDC power connector.

<u>product specifications</u>			
Audio signal-to-noise:	> 96 dB	Power supply rejection:	> 84 dB
Audio bandwidth:	20 KHz	Audio distortion:	< 0.1%
Channel separation:	> 78 dB	Power:	20 mA @ 12 VDC
Operating temp.	-40 deg. to + 85 deg.	Size:	2.4”(w) x 1.6”(h) x 1”(d)
Warranty	6 years	Weight:	1.2 oz.
