

STEP #1 - Install wall brackets with appropriate distance applied.

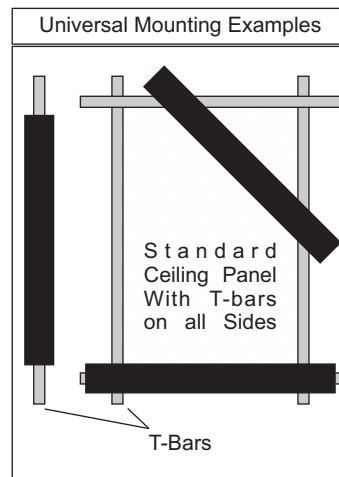

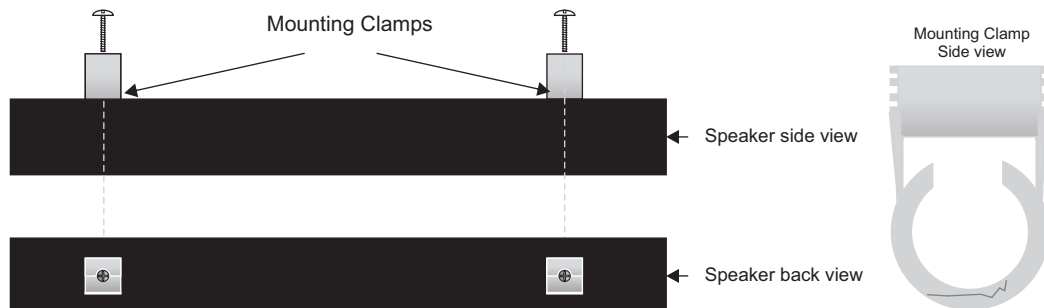

Mounting Information (from screw-hole-center to screw-hole-center):	
	Bracket Screw Center
PHA-4	 7-7/16"
PHA-8	 13-11/16"
PHA-16	 20-1/16"
PHA-25	 37-3/16"

STEP #2 - Mount speaker with brackets to installed wall brackets.

STEP #1 - Install mounting clamps onto the back of the PHA speaker as shown below.

STEP #2 - Install the second set of mounting clamps to the metal Bracket A as shown here.

STEP #3 - Affix the clamp assembly from Step #2 to the metal T-Bar located in the ceiling with the help of Bracket-B and the locking screw. Make sure the bracket is clamped over the T-Bar. When finished, the unit should look like the illustration below.

STEP #4 - Install the mounting pipe into the clamp assembly from Step # 3 by pressing firmly.

STEP #5 - Press the speaker assembly from Step #1 onto the mounting pipe from Step # 4. It should look like the illustration here.
NOTE: This process may require two people to accomplish.
